

Welcome to Fuzzy Buddy's!

We are happy you decided to join our pack! Here is some useful information about our daycare.

CONTACT US: (206)782-4321 or reservations@fuzzybuddys.com

OUR DAYS AND HOURS: Monday through Friday, 6:30 am to 7 pm

DROP OFF TIMES: 6:30 am to 2:45 pm

LATE PICK UP FEE: \$1 per minute for pick-ups after 7:00 pm, payable in cash directly to the closing staff. Please call us at (206)782-4321 if you foresee being more than five minutes late.

HOLIDAY CLOSURES: Memorial Day, Independence Day, and Labor Day

RESERVATIONS REQUIRED!

Please let us know in advance the day(s) you need. You can reserve specific dates or maintain a consistent weekly schedule. For all reservations requests that are more than 48 hours in advance, email us at reservations@fuzzybuddys.com or use the convenient form at www.fuzzybuddys.com. You are also welcome to call us last minute at (206)782-4321 to see if there is space available!

WAITING LIST

We usually fill up on Tuesdays, Wednesdays, and Thursdays. Our waiting list system works very efficiently, however, thanks to the diligence of our clients in cancelling unneeded reservations. If you wish to reserve a day that is full, you can be added to the waiting list and we will call you if a spot becomes available.

CANCELLING RESERVATIONS

Please call to cancel reserved days by 9 am the day of your reservation. That gives us a chance to call any dogs waiting for a spot. Repeated no shows without contacting us to cancel reservations will result in losing your standing reservations.

GAINING ENTRANCE TO OUR BUILDING

Because there may be unleashed dogs in our lobby, our front door is kept locked to reduce the risk of escape. The doorbell inspires noisy chaos in the playroom so please **knock** or ring the green **Doorbell of Peace** to get someone's attention. There should be staff behind the counter or in the office between 7 and 10 am, 12 to 1:30, and from 4 to 7 pm. If no one appears after 30 seconds, you can ring the Doorbell of Chaos. Please give us a minute to get to the door as it can be challenging to leave the playroom without letting dogs out too. The doorbell plays a loud tune, so there is usually no need to ring twice!

AUTHORIZED PICK UP LIST

When you arrive to pick up your dog, just tell us your dog's full name, your name, and a brief description of your dog. Once we get to recognize your face or your car, you may find that we are pulling your dog from the playroom as soon as we see you in the parking lot.

Many dogs have an extended network of family members, grandparents, dog walkers, and neighbors picking them up after daycare. If someone other than you will be picking up your dog, have that person tell us your dog's full name, the full name of one of the owners, and a description of your dog. We will assume that anyone being able to provide that information is authorized to pick up your dog.

If you will be traveling, please give us contact information for your dog's alternate caretaker in case we need to contact them about an injury or illness, and in case they forget to pick up your dog. It is also helpful to have the dates that you will be out of town.

If there are people in your life absolutely unauthorized to pick up your dog, please give us their names and descriptions or photographs so we can alert you to any attempts to gain possession of your dog. In addition, if you want to block everyone but legal owners from picking up your dog, we will photograph all the authorized caretakers and be alert to the restrictions.

FEES AND PAYMENT

All fees are payable in advance or on day of service. We accept cash, checks and credit cards. There is a fee of \$35 charged for returned checks. Daycare passes are good for six months and are non-refundable. Monthly passes are valid for 30 calendar days (20-22 daycare days.)

OUR PARKING LOT

Please keep your dog on leash in the parking lot and lobby. If you are headed south on Aurora you may find it convenient to park on Aurora which is permissible between 9am and 3pm. Do not park in front of the Rose Corner.

Please keep the handicapped parking spot open for the clients rely on it in order to safely move their dogs in and out of the building. We allow people with temporary disabilities (leg, arm or back injuries) to use that space when necessary. We encourage anyone with a mobility issue to ask for help getting your dog in or out of the building. You can even call ahead to alert us to your arrival so we can get your dog from your car or bring your dog out to you at pick up time.

PLAYROOM UNIFORM: HARNESSSES

Harnesses allow for safe play without the risk of strangulation that collars present. Harnesses also allow us to handle the dogs in a less confrontational way than grabbing and restraining dogs by the collar. If your dog chews through every harness you have ever put on him or has sensitive skin easily irritated by harnesses, we will use an alternate playroom outfit.

OWNER'S RESPONSIBILITIES

Please keep us updated regarding any changes with your dog's physical or behavioral health. If he becomes injured when he is having fun with you, let us know so we can monitor his play to prevent further injury. If you notice any behaviors that have you concerned about his ability to play safely with others, please discuss the situation with us.

We are required by King County Public Health to keep our client's vaccination records on file. After your dog receives his yearly vaccinations, please have your vet fax us a copy of the records or bring in a copy for your dog's file. We do not accept a dog into our daycare without a current rabies vaccination.

NEUTERING AND SPAYING

We accept unneutered male dogs up to 12 months of age. If inappropriate hormone-induced behaviors like obsessive mounting are getting in the way of healthy play, we will ask that your dog stay home from daycare until two weeks after neutering. Often an unneutered dog behaves perfectly in the playroom, but is the recipient of inappropriate mounting from his neutered cohorts. In that case, we will also ask that your dog stay home from daycare until neutered as we do not want him to be overwhelmed with unwelcome attention.

Please do not bring unspayed females during their heat cycle, around the time their heat cycle is expected to begin, or three weeks after their cycle ends. If hormone-related behaviors like inappropriate mounting disrupt healthy play, we will ask that your dog stay home from daycare either for a couple weeks or until after spaying surgery.

FEEDING AND MEDICATION

If your dog needs a meal while at daycare, please provide food in a container clearly marked with your dog's name. If more than one feeding is in the container, indicate the amount to be given per meal. We feed lunches between noon and 1:30, but if your dog needs a meal outside of those times, just label the container with the time they need to receive the food. If your dog has food allergies or should not be given treats while at daycare, please let us know.

Active dogs may need lunch even if their typical day does not include a mid-day meal. Dogs burn more calories running around and romping with friends than they do resting on the sofa at home. A hungry dog can get grumpy at the end of the day or even start to snack on poop! If we notice signs your dog would benefit from a lunch, we will let you know.

If your dog needs oral or topical medication during the day, provide us with the medication in its original container marked with your dog's name, directions on dosage and how it is to be given.

PET WEIGHT MANAGEMENT

Many of our clients start daycare in order to help their dog lose weight. If your dog scores an 8 or 9 on the Purina Body Condition System chart, we require veterinarian approval for your dog to start or continue daycare. Getting professional guidance on getting your dog back to a healthy weight will also allow you to rule out medical causes for weight gains, like diabetes and thyroid disease.

If your dog is underweight, we will suggest your dog get lunch while here. We will also recommend veterinary approval for daycare if your dog scores a 1 or 2 on the Purina Body Condition System chart. Some dogs have trouble gaining weight due to an underlying medical condition.

TOENAILS

Long toenails can catch and tear, which is painful for the dog. Often the entire nail will need to be removed in order for the wound to heal properly. Because of this risk, we ask that owners be vigilant about keeping their dogs' nails trimmed.

A Fuzzy Buddy's staff person may be available to trim your dog's nails for a fee of \$10, paid in cash to the staff person who does the trimming. Because we want Fuzzy Buddy's to be a positive place for all dogs, if your dog has a strong adverse reaction to having their paws handled or nails trimmed, we will not persist in our trimming efforts and you will not be charged.

ILLNESSES

If your dog should contract a contagious illness or have internal parasites, please keep them home from daycare and dog parks! Illnesses and parasites (like fleas) can spread amongst dogs in daycare just as colds, viruses, and lice spread like wildfire at child daycares. We rely on you, the owner, to keep a close eye out for contagious illnesses and keep your dog home for the health and safety of all.

Examples of such illnesses include giardia, kennel cough, conjunctivitis, and worms. Evidence of illness includes coughing, unexplained diarrhea or vomiting, runny eyes, and extreme lethargy. Please call Fuzzy Buddy's so we know your dog is ill. Consult your veterinarian regarding when your dog is safe to return to daycare. If we notice symptoms of a contagious illness in your dog while at daycare, your dog will be immediately quarantined and you will be notified.

If your dog has been coughing at home, please keep him away from daycare until there has been at least five days without coughing. If your dog coughs upon entry to the lobby, we will ask that he return home for the day until it can be determined whether or not he has a respiratory infection. If we hear your dog cough at daycare, he will be quarantined and you will be contacted to pick him up as early as possible. Coughing is a non-specific sign and many dogs cough regularly due to tracheal damage or allergies. If you know that your dog coughs when excited or for reasons other than illness, please let us know. This may prevent us from needlessly isolating him from other dogs. If other dogs have kennel cough, however, we need to treat all coughing dogs as if they are ill.

Contracting minor illnesses can happen in any social situation—dog daycare and dog parks for dogs, schools and workplaces for humans. Luckily, our ongoing sanitation efforts at Fuzzy Buddy's and diligence about noticing symptoms and isolating potentially sick dogs, keeps outbreaks to a minimum. Many parents have commented that they wish their child's daycare or preschool was as illness-free!

FLEA CONTROL

If fleas are present on your dog, keep your dog home from daycare. If we find fleas on your dog, we will give your dog a flea bath. If we find fleas on your dog more than twice in a three-month period, we will charge you \$10 for any necessary flea baths and your dog will not be able to return to daycare until you bring in proof that you have started your dog on a veterinarian-prescribed flea product, preferably an oral medication like Trifexis. Flea combing your dog on a regular basis will alert you to any issues before they become infestations.

BEHAVIOR CONTROL

We aim to respond to inappropriate behavior quickly and consistently. When we see inappropriate behavior in the playroom, we tell the dog, "Easy!" If the behavior continues, we tell the dog, "Wrong" and lead him to a time-out pen. It takes multiple repetitions of the Easy/Wrong/Time-out sequence for a dog to learn that when he hears us say his name and "Easy!" he needs to find something else to do. Most dogs respond to this wonderfully, allowing us to use our voices to stop behaviors like mounting, overwhelming crazy play, and excessive barking. Time-outs are usually less than 5 minutes long, unless the dog needs a longer break to calm down.

Stress-reducing tools we employ include flower essences, lavender aromatherapy oils, DAP (Dog Appeasing Pheromone), and Thundershirts. We may also give stressed dogs breaks in quiet spaces, like the office or lounge, and reintroduce them slowly to the activity of the playroom.

THE HUMANE HIERARCHY AND OUR CODE OF ETHICS

Fuzzy Buddy's dog handling protocols are based on Dr. Susan Friedman's "Humane Hierarchy", the Least Intrusive Minimally Aversive (LIMA) approach adopted by the Certification Council for Professional Dog Trainers (CCPDT) and the International Association of Animal Behavior Consultants. Our dog handling practices also comply with the CPDT Code of Ethics and "Training and Behavior Practices Policy." Violations of those policies could result in loss of certification for Fuzzy Buddy's staff who have earned their CPDT certification.

The Humane Hierarchy, LIMA, and the CPDT Code of Ethics recognize that positive punishment tools such as electronic shock collars, choke chains, or prong collars should only be employed after all other training techniques have been exhausted. This would mean that health, nutrition, and physical factors have been evaluated; the antecedents that initiate the behavior are controlled; positive reinforcement and classical conditioning have been explored; negative punishment, extinction and negative reinforcement have been employed. If a professional trainer has guided an owner/dog team through all those tiers of the Humane Hierarchy and the dog still has a behavior issue that necessitates the use of positive punishment, the dog is probably not suitable for daycare.

We will not, even at the owner's request, use behavior control methods that rely on pain or fear to suppress unwanted behavior. Examples of methods we will *not* use include alpha rolls, kneeling, leash corrections, hitting, kicking, squirt bottles or electric shock collars.

Collars relying on pain to suppress pulling should not be worn when walking into Fuzzy Buddy's—specifically metal or plastic prong collars, choke chains, and shock collars. We want your dog to associate coming to daycare with only good things. (Staff will not dress dogs back in these collars at the end of the day due to our adherence to the Humane Hierarchy.)

We recognize that such "training collars" were common in the past and many owners turn to them not realizing how much dog training has changed in the past decade or so. If you are intrigued by the possibility of getting your dog off a "training collar", let us know and we will talk you through it.

New evidence shows that collars—even buckle collars—can contribute to tracheal damage, thyroid issues, glaucoma, and joint issues. Harnesses are the healthier choice for dogs who need extra control. In addition, prong collars, choke chains, and shock collars can increase reactivity or even aggression, especially in shy or over-excited dogs. If your dog is walked on a training collar and you have seen an increase in reactivity, do not hesitate to change your equipment. We will give you a free harness and give you tips on using it!
